-
- The diagram illustrates the evolution of a neural network through five stages, each represented by a horizontal row of boxes (neurons) and a black dot (input neuron):
- Stage 1:** A single black dot is connected to one white box.
 - Stage 2:** A single black dot is connected to two white boxes.
 - Stage 3:** A single black dot is connected to four white boxes, with the middle two boxes highlighted in red.
 - Stage 4:** A single black dot is connected to eight white boxes.
 - Stage 5:** A single black dot is connected to sixteen white boxes.
